Consciousness, at its simplest, is sentience or awareness of internal and external existence. Despite millennia of analyses, definitions, explanations and debates by philosophers and scientists, consciousness remains puzzling and controversial, being "at once the most familiar and most mysterious aspect of our lives". Perhaps the only widely agreed notion about the topic is the intuition that ...

Two other concepts that are important for understanding the behaviorist ideas of speech and language development are imitation and practice. A young child will try to imitate sounds and words he hears his parents say the best he can. When a child says a word that sounds close to what the parents say, they accept and reinforce it.
