Paleontologists look at minute details to determine further fossil identification and classification. With the trilobites, they consider the construction of their eyes, the variation in the segments of the body, the quality of the exoskeleton-whether it has a smooth surface or rough-the presence of antennae, and even the internal organs!

The MLM Master List intends to provide a reference for the names of all known past and present MLM schemes (and some direct selling schemes, where applicable).. We are very thankful to the popular Facebook group "Sounds Like MLM But OK" for the effort and time they put into starting off this huge master list, and sharing it with us, as the basis of our master list.
