You can use an e-reader app on your computer, too, to make reading and organizing your ebooks easy.

### Principles Of Isotope Geology 2nd

Geology (from the Ancient Greek γῆ, gē ("earth") and -λογία, -logia, ("study of", "discourse")) is an Earth science concerned with the solid Earth, the rocks of which it is composed, and the processes by which they change over time. Geology can also include the study of the solid features of any terrestrial planet or natural satellite such as Mars or the Moon.

### Geology - Wikipedia

Fractional crystallization, or crystal fractionation, is one of the most important geochemical and physical processes operating within crust and mantle of a rocky planetary body, such as the Earth. It is important in the formation of igneous rocks because it is one of the main processes of magmatic differentiation. Fractional crystallization is also important in the formation of sedimentary ...
